

Install Azure CLI on Windows

(LAB-100-01-03)

Step 1: Install Azure CLI on Windows

1. Download Install Azure CLI on the Windows operating system using the MSI installer:
<https://aka.ms/installazurecliwindows>

2. Once Azure CLI installed, check the version
`az -version`

3. Login in Azure CLI
`az login`

Sign in with your account credentials in the browser.

Note: If you successfully login, it will display Id, Subscription details, tenant id, etc.

Step 2: Test CloudShell for CLI

Azure CloudShell also supports Azure CLI.

4. To check the Azure CLI version
`az -version`
