Create Resource Group & Resource (CLI)
(LAB-100-01-04)

Step 1: **Create Resource Group from Azure CLI or Cloud Shell**

1. Create resource group
   az group create --name myresourcegroupdemocli --location westus

2. Verify your resource group.
   az group list

3. Remove your resource group. When prompted, confirm.
   Remove-AzResourceGroup -Name myresourcegroupdemocli

4. Create new resource (Network Security Group)
   az network nsg create --name nsg2 --resource-group
   myresourcegroupdemocli

   Note: Execute as single command

5. Display all the resource in the specific resource group
   az resource list --resource-group myresourcegroupdemocli

Optional

6. Delete specific resource group. When prompted, confirm.
   az group delete --name myresourcegroupdemocli
